Doggie Myth Buster: The Truth about Common Dog Myths

Myths regarding dogs, their behavior and how to train them have been told for centuries. We have all heard these phrases before...but are they true?

- Tugging makes dogs aggressive.
- If my dog goes out the door first, he is dominant.
- Bones are dangerous for dogs to chew.
- To show a dog that you are in charge, pin them until they "submit".
- Don't let your dog sleep on your bed or couch.
- If you train dogs with food they wouldn't respect you.
- Dogs that bite will always bite.
- All dogs can be rehabbed.
- Purebred dogs cannot be found in shelters.
- A dog wagging its tail is a happy, friendly dog.
- An old dog can't learn new tricks.

During this workshop, we will present the facts behind some of the most common myths about our canine friends!

Instructor: Leigh Siegfried; Certified Pet Dog Trainer
Founder Opportunity Barks

Date: Monday, March 1, 2010 7:00-9:00 PM

Location: Delaware Valley College; 700 East Butler Ave., Doylestown, PA
Mandell Building, Room 114
